SIX3 TILE[®]
PRODUCT OVERVIEW

KITCHEN BACK SPLASH KIT

Six3 Tile® is an innovative, patented tile product that is a single, integrated system providing the classic look and feel of traditional ceramic tile without the need for costly specialized skills or tools. Ideal for bathroom tub surrounds, showers, kitchen backsplashes and walls, these lightweight, flexible yet durable large sheets install with a speed that is unmatched, resulting in a cost-efficient, professional look in about an hour.

FAST!

There is no unique surface preparation necessary. Installation of tile sheets is extremely fast and easy. A typical kitchen backsplash or standard size tub surround goes up in about an hour.

EASY!

There are no special skills or tools needed to install Six3 Tile. Straight cuts can be made with a circular saw, utility knife or rotary cutter. Intricate cuts can be made with an oscillating saw. Construction adhesive or Type-1 mastic is used to mount the tile to just about any surface.

RESOURCEFUL!

We maintain a library of resources on our web site, including manuals and videos on a variety of topics, including installation techniques and testimonials.

Standard Back Splash Kit- 5 sheets

- 36" wide by 24" tall by 1/4" thick
- Four (4) back pieces
- 60" wide by 24" tall by 1/4" thick

Total square feet: 84

Covers a standard 36" x 60" x 8' ceiling

Standard Color: Gloss White

Six3 Tile® has designed a unique joint seal for stacked tile sheets in wet applications. A pre-cut channel fits over a tab automatically creating a grout channel while preventing water from penetrating the seam. When used with standard PVC cement, this joint creates a chemical weld that is invisible, strong and water-tight.

EASE OF INSTALLATION

1 MEASURE AND CUT SHEETS

You can use a standard utility knife, rotary cutter, oscillating saw or circular saw to cut the tile. Access holes for pipes, light switches and outlets can be cut with a hole saw or oscillating saw. No special tile skills or tools are needed to install Six3 Tile®.

2 ATTACH TO SURFACE

No special surface prep is necessary. Six3 Tile can be installed over drywall, cement backer boards or even existing tile. Attach tile sheet to the surface using construction adhesive or type-1 mastic. Our tile sheets are flexible for easy installation around obstacles or uneven surfaces. For backsplashes, use spacers on joints to maintain consistent grout lines. Tub surrounds incorporate a water-tight seal that also creates proper grout lines.

3 GROUT, FINISH AND ENJOY!

Edging can be used on exposed ends. Grouting can begin immediately. Use unsanded or nonsanded grout only. What would normally take days with traditional ceramic tile, takes only about an hour with Six3 Tile!

COLORS

Standard colors are Gloss White (SW7757), Passive Gray (SW7064) and Software Gray (SW7074) in both gloss and matte finishes. We are a proud partner with Sherwin-Williams color products and reference their SW paint codes (SWxxxx) for our finishes.
