SHOWER & TUB SURROUND PRO KITS

Tiling Solutions Simplified™

Your next shower renovation in one kit.

Six3Tile Pro Kits include everything you need to rapidly renovate any outdated bathroom with modern, luxury tile. Become a Six3Tile Pro with no additional tools or skills required.

NOW IN 4 NEW COLORS!

LUXURY TILE ON TREND

REFRESH YOUR OUTDATED BATHROOM WITH MODERN STYLES

Avoid tile Demolition

Install right over your existing ceramic tile with construction adhesive. Cement board and specialty sub-contractors are not required!

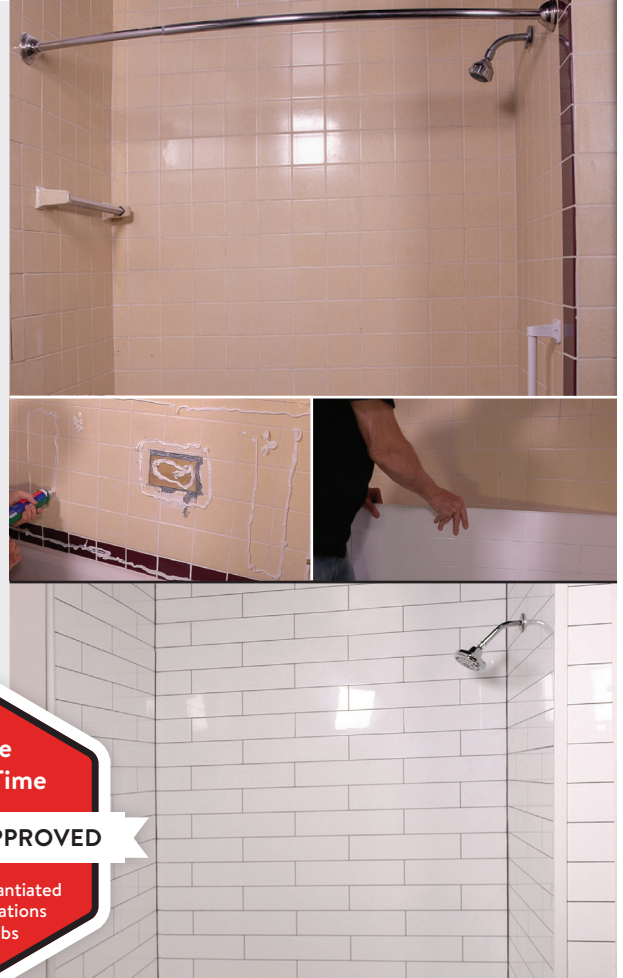

Lightning-fast Installation

Every second saved installing tiles gets you one step closer to an updated bathroom. Home Innovations Research Labs (HI), an independent, third-party research group, tested Six3Tile and found that our tile panels install 2.5x faster than ceramic tile!

Proven Durability

To test Six3Tile's durability, HI's extensive rounds of testing included stain resistance, accelerated weathering, and water resistance. Six3Tile passed all testing, proving that our tile-panels are a great alternative to ceramic tile, with a fraction of the installation time

ELEVATED STYLE, EASY INSTALLATION

Quick & Easy Application

Rapidly renovate your shower and tub surround with no special skills or tools. Six3Tile installs 2.5x faster than laying traditional ceramic tile, reducing tenant displacement and saving you time and money.

Adhesives and Substrates

Six3Tile can be applied over existing tile or any other flat surface, saving demolition and waterproofing costs. When attaching Six3Tile, use construction adhesives to safely secure each tile panel to a variety of substrates, including drywall, cement backer board, ceramic tile, vinyl-over-gypsum, concrete, brick and PVC.

Finishing and Grouting

Finish off exposed ends with trim to give your shower or tub surround a custom, professional look. Non-sanded or unsanded grout can be applied as soon as you want – there's no need to wait for curing. The watertight seal is accomplished when the appropriate substrate is in place, Six3Tile is applied, and grouting and caulking have been completed.

Care and Maintenance

Standard household sponges or clean, soft towels paired with any typical, non-abrasive cleaning products can be used to keep tile panels clean. White vinegar is perfect for tough stains.

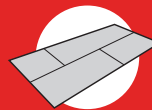

BENEFITS

Installs 2.5x faster than ceramic tile

Durable & Stain Resistant

Pre-cut tile panels

No special skills or tools required

Hassle-free, grout immediately

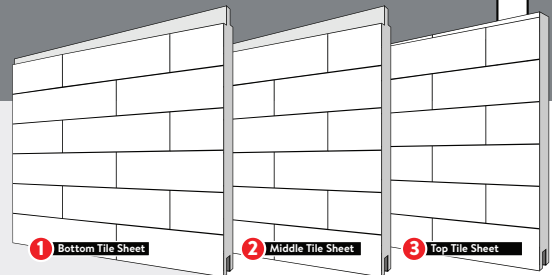

Quick and easy, reduced resident displacement

Watertight Seal

Pre-cut groove fits over a tongue automatically creating a grout channel while preventing water from penetrating the seam

WHAT'S IN THE BOX?

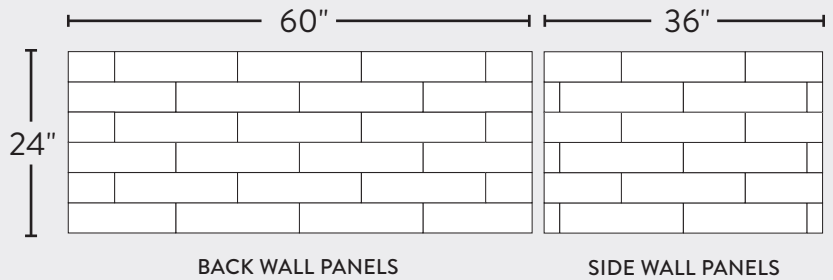

YOUR NEXT RAPID RENOVATION IN ONE KIT
